Abstract:

The current research aimed at clarifying the concept of intellectual security & its most prominent threats. The descriptive approach was used to uncover a range of threats that affect the intellectual security of young people. These include: [4]th generation wars, which rely on modern technology the Internet, which is a form of closure of thought, religious extremism, distance from the tolerant moderation and the disruption of the mind from the correct

understanding of religion, the social exclusion of young people and their lack of participation in decision-making & poverty and ignorance, which lead to the deviation of thought.

The research revealed that there are some defects on educational institutions in educating young people and protecting them against intellectual invasion. The issue of intellectual security is a national issue that requires the cooperation of all governmental and non-governmental governmental institutions to raise awareness of the dangers of intellectual deviation.

Key words:

1- The concept of intellectual security.

2 - Threats of intellectual security.
