Abstract

The study problem is determined in (the extent of the effectiveness of e-learning in light of the spread of the Corona virus from the point of view of faculty members in Egyptian universities). This study aims to reveal the effectiveness of e-learning in light of the spread of the Corona virus from the viewpoint of faculty members in Egyptian universities. It also aims to measure the level of continuity of the e-learning process and reveal the level of obstacles to the use of e-learning and the level of interaction of students and faculty members with e-learning in Egyptian universities.

The study seeks to answer the following question: What is the effectiveness of e-learning in light of the spread of the Corona virus from the viewpoint of faculty members in Egyptian universities? This study is considered one of the descriptive and analytical studies. The
