Abstract:

Abstract: The study aimed to identify the role of faculty members in activating knowledge economy for female students of the College of Basic Education in the State of Kuwait from female students' point of view, and the effect of some variables on that. The study followed the descriptive approach, and the sample consisted of (836) students, on whom a questionnaire was applied consisting of (32) statements distributed on four axes. The results showed that the role of faculty members in activating knowledge economy as a whole for female students is average, and the axes came in the following order: The role of faculty members in activating the dissemination and exchange of knowledge came in the first order, followed by their role in activating the possession and storage of knowledge, then
