

Towards a Strategy for Reforming Education in the Arab World for the Coexistence of Cultures (Future Outlook).

Dr. Fatima Zahra Salem *

Abstract:

The issue is broad based on a broad societal understanding of the issue of reform and based on an environmental survey approach as an input to strategic planning. The scenario approach was also used to chart this broad strategy, focusing on four key scenarios: the state scenario, the state's fundamentalist scenario, the neoliberal scenario and the civil society scenario.
